Art Unit: 2629

1. Status: Please all replies and correspondence should be addressed to examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 10-12-2006 under amendments, which have been placed of record in the file. Claims 1-40 are pending in this action.

Response to Amendment

Please all the replies and correspondence should be addressed to examiner new art unit 2629. The amendment filed 10-12-2006 does not introduce new matter into the disclosure. The added material which is supported by the original disclosure.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 1-3,8-10,11-13,18-20,21-23,28-30,31-33,38-40 are rejected under 35
 U.S.C. 103(a) as being unpatentable over Ichikawa (US2004/0119700 A1) in view of (Moriya et al. (US 2003/0006975 A1) and Westerman et al. (US 2005/0104867 A1).

Art Unit: 2629

Regarding Claim 1,11,21 and 31, Ichikawa teaches a capacitive touchpad integrated with key (page 1, paragraph 1,8) and handwriting functions (page 1, paragraph 4), comprising: a panel for touch inputting (page 1, paragraph 1).

However, Ichikawa fails to teach a mobile phone; a first pattern on said panel for representing a mode switch to switch said touchpad between a key mode and a handwriting mode; a plurality of regions defined on said panel; and a plurality of second patterns on said plurality of regions for operation in said key and handwriting modes.

Moriya et al. teaches a mobile phone (page 1, paragraph 1) a first pattern on said panel for representing a mode switch to switch said touchpad between a key mode and a handwriting mode (page 5, paragraph 54, Lines 6-12, page 2, paragraph 12, right hand side column, Lines 6-9, paragraph 13, Lines 1-11); a plurality of regions defined on said panel (page 2, paragraph 10, Lines 1-13, page 5, paragraph 54,55); and a plurality of second patterns on said plurality of regions for operation in said key and handwriting modes (page 2, paragraph 13, Lines 1-9, paragraph 12, Lines 1-7).

Thus it would have been obvious to one in the ordinary skill in the art at the time of invention was made to incorporate the Moriya et al. teaching of in the teaching of Ichikawa to be able to have small informational devices such as personal digital assistants (PDA) and cellular mobile telephones with LCD and, in particular to means for inputting graphical and spatial information into such devices using a touch pad.

However, Ichikawa modified by Moriya et al. fails to recite or disclose a plurality of regions selectively defined on said panel responsive to actuation of said mode switch; and a

Art Unit: 2629

plurality of second patterns selectively defined on said plurality of regions for operation in said key and handwriting modes.

However, Westerman et al. teaches a plurality of regions selectively defined on said panel responsive to actuation of said mode switch (page 5, paragraph 43, page 8, paragraph 111-114, page 7, paragraphs 106-108, the mode recognizing the mode and selective hand gesture selects region of operation selectively per hand movement); and a plurality of second patterns selectively defined on said plurality of regions for operation in said key and handwriting modes (page 5,6, paragraphs 41,42,43,44, page 8, paragraph 111-114).

Thus it would have been obvious to one in the ordinary skill in the art at the time of invention was made to incorporate the teaching of Westerman et al. in the teaching of Ichikawa to be able to have a user friendly integrated generic manual input device such as typing, handwritings, multiple degree of freedom manipulation on a multi-touch surface with ergonomic, economic and productivity advantage.

Regarding Claim 3,13,23 and 33, Ichikawa teaches an LCD for displaying an input from said panel (page 3, paragraph 57).

Regarding Claim 2,8-10,12,18-20, 22, 28-30 and 32, 38-40, Ichikawa fails to teach a mouse or key/handwriting mode for switching thereto by touching said first pattern; a recognition module for recognizing an input trace onto said panel in said handwriting mode; a judgment module for determining a number of fingers touching onto said panel; and a plurality of second patterns comprises a plurality of key patterns for performing a telephone keyboard.

Art Unit: 2629

Moriya et al. teaches a mouse or key/handwriting mode for switching thereto by touching said first pattern (page 5, paragraph 54,55, page 6, paragraph 59); a recognition module for recognizing an input trace onto said panel in said handwriting mode; a judgment module for determining a number of fingers touching onto said panel (page 6, paragraph 59); and a plurality of second patterns comprises a plurality of key patterns for performing a telephone keyboard (page 1, paragraph 1, paragraph 3, Lines 9-14, page 2, paragraph 13, Lines 1-9, paragraph 12, Lines 1-7).

Thus it would have been obvious to one in the ordinary skill in the art at the time of invention was made to incorporate the Moriya et al. teaching of in the teaching of Ichikawa to be able to have small informational devices such as personal digital assistants (PDA) and cellular mobile telephones with LCD and, in particular to means for inputting graphical and spatial information into such devices using a touch pad; where touch pad would operate on different mode selected input to input handwriting, key or cursor control.

4. Claims 7,17,27 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ichikawa (US2004/0119700 A1) in view of (Moriya et al. (US 2003/0006975 A1) and Westerman et al. (US 2005/0104867 A1) as applied to claims 1-3,8-10,11-13,18-20,21-23,28-30,31-33,38-40 above, and further in view of Nozaki (US 7,030,862 B2).

Regarding Claim 7,17, 27, and 37, Ichikawa modified by Moriya et al. and Westerman et al. fails to teach a backlight for said panel.

However, Nozaki teaches a backlight for said panel (Col. 2, lines 32,33).

Art Unit: 2629

Thus it would have been obvious to one in the ordinary skill in the art at the time of invention was made to incorporate the Nozaki teaching of in the teaching of Ichikawa modified by Moriya et al. and Westerman et al. to be able to have touch panel with back-lightings so that make image forming apparatus easier to use in another words to have a user friendly input device.

Allowable Subject Matter

- 5. Claims 4-6,14-16,24-26 and 34-36 are allowed.
- 6. The following is an examiner's statement of reasons for allowance:

Applicant has amended objected claims 4,14,24 and 34 adding limitations of independent claim they depend from respectively. After further search and consideration cited prior art fails to recite or disclose uniquely distinct features of underlined bold claims below;

A capacitive touchpad integrated with key and handwriting functions, comprising: a panel for touch inputting; a first pattern on said panel for representing a mode switch to switch said touchpad between a key mode and a handwriting mode; a plurality of regions defined on said panel; and a plurality of second patterns on said plurality of regions for operation in said key and handwriting modes and panel comprises: a substrate selected from the group consisting of PCB, membrane and transparent plate; a conductor wiring on said substrate; and an insulator covered on said conductor wiring; conductor wiring comprises an ITO and insulator is transparent.

Art Unit: 2629

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

7. Applicant's arguments, see remark, filed 10-12-2006, with respect to the amended claim(s) 1,4,11,14,21,24,31 and 34 under arguments have been fully considered and are persuasive about the prior art teachings. However, upon further consideration and search, a new ground(s) of rejection is made in view of Westerman et al. (US 2005/0104867 A1).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2629

however, will the statutory period for reply expire later than SIX MONTHS from the date of this

Page 8

final action.

9. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Prabodh M. Dharia whose telephone number is 571-272-7668.

The examiner can normally be reached on M-F 8AM to 5PM.

10. The fax phone number for the organization where this application or proceeding is

assigned is 571-273-8300.

11. Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any response to this action should be mailed to:
